Liquidity

Bullion is bought directly from or sold directly into the global bullion markets. Purchases or redemptions of any size can be accommodated without affecting Net Asset Value. As a result BMG Gold BullionFund has the same liquidity as gold bullion itself. In contrast, the liquidity of closed-end funds and ETFs are dependent on the number of shares that are traded.

No Counterparty Risk

BMG Gold BullionFund owns the bullion outright, with no dependency on third parties and no possibility of third-party claims.

Independent of Portfolio Management Skills

BMG Gold BullionFund has a fixed investment policy that cannot be varied without unitholder approval. Risk is avoided since BMG Gold BullionFund does not hedge, market time or leverage. As a result, performance tracks the price of bullion and is not dependent on the trading skills of a portfolio manager.

Tax Efficient

No sales tax or withholding tax is applicable on bullion in Canada. BMG Gold BullionFund is approved for all Canadian registered plans, including RRSPs, RRIFs & TFSA's.

Risk Rating

This risk rating of the Fund is in accordance with a standard risk classification methodology based on how the fund's returns have changed from year to year as a **stand-alone** investment.

See the Fund's Simplified Prospectus, for more information about the risk rating and specific risks that can affect the fund's returns.

The BMG Gold BullionFund is **not intended to be a stand-alone investment**, and should not represent more than 20% of an investor's overall total investment portfolio including any other bullion investments. Due to the fact that gold bullion typically has a low correlation to other financial assets, including it as part of a portfolio should generally reduce the portfolio's volatility and may improve portfolio returns over the long term.
